

Gems by colour range

Did you know that when choosing a gemstone for a piece of jewellery that you will have a choice of gems that fit into the colour range you are looking for?

If you were looking for a blue gemstone, and depending on the depth of colour you require, you would have nine different gemstones that are blue to choose from!

This fact is an advantage for the buyer because the buyer not only has a choice of gem but a choice of colour within the required colour band and hence a wider choice to suit individual needs and budget.
